

Why join IMOA?

Join our global industry community that represents around **91% of molybdenum mine production** and almost all conversion capacity, outside China.

IMOA brings together a significant part of the value chain that connects people through networking and generates different perspectives. It is a very powerful way of using collective minds and economies of scale to more effectively manage issues and projects across HSE, responsible sourcing, and market development. Membership also offers access to valuable market data and studies.

IMOA Member

THE BENEFITS OF JOINING IMOA

By becoming a member, you will have access to benefits including:

Economies of Scale

Benefit from economies of scale that result from jointly undertaking HSE, Market Development and Responsible Sourcing programs and sharing the cost of ongoing market studies, data and statistics.

Regulatory Coordination

Benefit from a jointly funded proactive approach to developing rigorous scientific evidence to support appropriate regulation. Industry technical support includes toxicological datasets, safety data sheet template updates, global average carbon footprint data and more.

Exclusive Molybdenum Market Data and Studies

Access quarterly molybdenum production and end use data, import/export statistics and market studies.

Unique Networking Opportunities

Attend member-only networking events, including our AGM with around 150 industry participants, a program of topical presentations, and site visits, plus other in-person networking events.

In Focus Webinars

Access exclusive webinars on topics such as end use market updates, responsible sourcing, and regulatory matters.

Committee Involvement

Join our Market Development or HSE Committees for the opportunity to guide IMOA-funded projects and the strategic direction of the Association.
